15 Min Maj. Plan	94,730	83.0%

Analysis: Only 83% of voters are being supplied with sufficient access to early voting sites.

There is a real cost to travel time in terms of voter likelihood. Various studies have measured increase of voter likelihood to not vote between .64% and 5% per mile that they reside from the voting site. There are very real opportunity and fiscal costs to voting from a greater distance. A 30-minute or more commute combined with time to vote, price at the pump and other, harder to gauge factors, have a significant effect on early voting likelihood.

We have identified two sites, whose addition would allow for 91% coverage of Davidson County for early voting access.
