15 Min Maj. Plan	52,762	70.6%

Analysis: Only 70% of voters are being supplied with sufficient access to early voting sites in Moore County.

There is a real cost to travel time in terms of voter likelihood. Various studies have measured increase of voter likelihood to not vote between .64% and 5% per mile that they reside from the voting site. There are very real opportunity and fiscal costs to voting from a greater distance. A 30-minute or more commute combined with time to vote, price at the pump and other, harder to gauge factors, have a significant effect on early voting likelihood.

We have identified three sites, whose addition would allow for over 87% coverage of Moore County for early voting access.
